Some Helpful Tips

For the most accurate reading, measure your fingers towards the end of the day when your hands are at their largest. Avoid measuring your fingers when it's cold or first thing in the morning.

Remember most people will find that their hands can change size slightly depending on a number of factors. One of the most common is the weather. On hot days you may find your rings will become tighter and on cold days they may feel loose. Your fingers will change from day to day and even from morning to night.

Note:

To Print:

Select A4 as the paper size. Under page scaling select "None". This will ensure an accurate representation of the ring sizes is printed.

How to find your ring size:

First, find a ring that perfectly fits you or the person you are buying for. Then match the INSIDE circumference of the ring with the closest ring size.

All dimensions are in millimetres (mm).

To establish your ring size:

a) Take the INTERNAL diameter measurement of one of your existing rings and equate it to the chart on the left.

Or

b) Use the ring size ruler on the right.

To use the ruler:

- 1) Print this PDF at 100% - make sure that the 'Page Scaling' is set to 'None' in the 'Print Handling' section of the print screen.
- 2) Measure the line below, it should measure 5cm. If this is the case, then you have printed this page out to the correct size.

- 3) Place your ring on the bottom of the scale on the right with its inside left edge on the left edge of the circle.
- 5) Slide the ring up the scale, looking through the centre until you can see the right hand line.
- 6) The ring size you need is shown inside the ring.

This indicates a ring with a size of P ½
